

Exp. No.: 5	Drawing figure of eight using offset
Date:	

Aim:

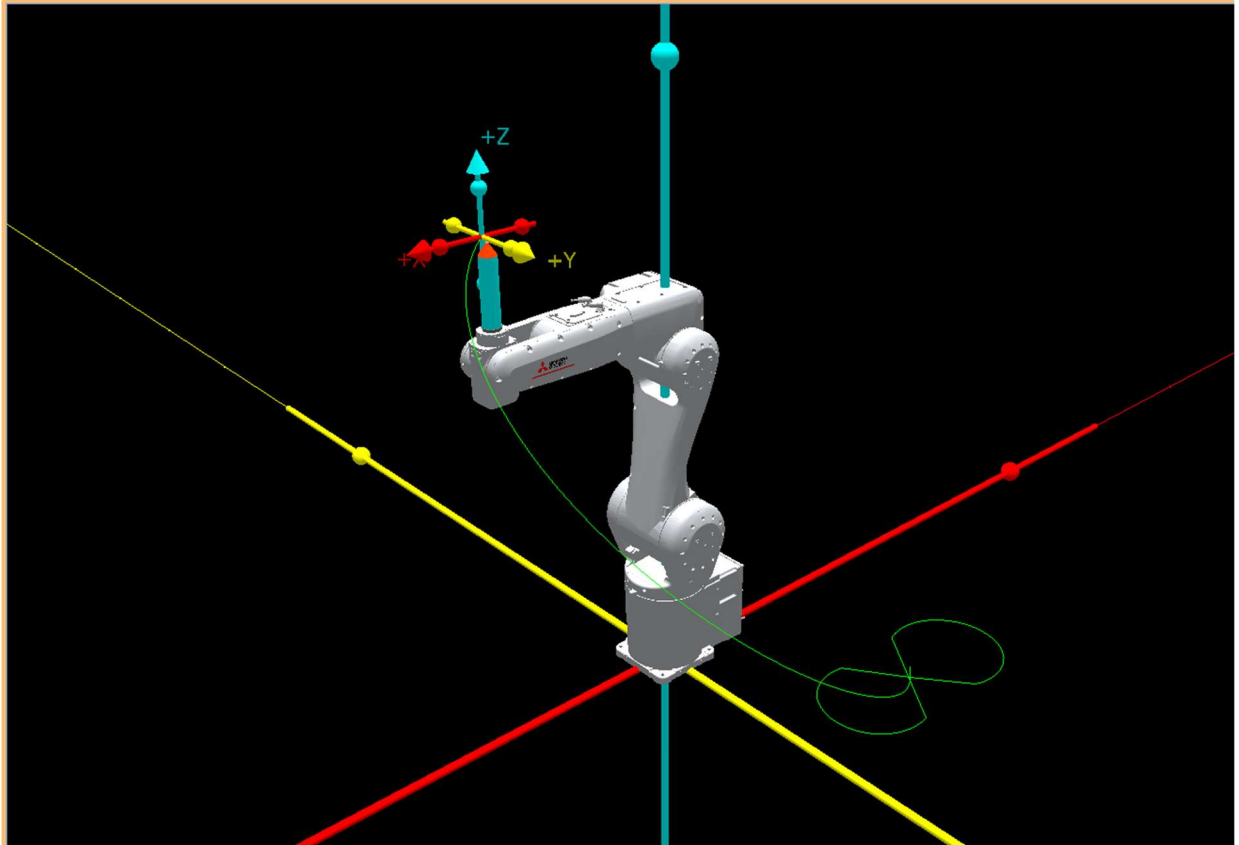

To program the robot to draw the figure 8 using an inbuilt option providing offset in any direction.

Procedure:

- Power On and Initialize the Robot
- Command the robot to move to its designated home position.
- Attach a specific tool for drawing (e.g., a pen or marker) to the robot's end-effector.
- Calibrate the drawing tool to ensure correct positioning and alignment.
- Define the path that the robot should follow to create the desired drawing.
- Write a program to instruct the robot on how to move along the defined path as the tool tip moves to draw the figure 8 from (500, 0, z) along the via points (450, 40, z), (410, 0, z) and (450, -40, z).
- Execute the programmed sequence to instruct the robot to follow the specified path using offset and create the drawing.
- Monitor the drawing process in real-time, making adjustments as needed to correct any deviations or issues.
- Send the robot back to its home position once the drawing operation is finished.

RT Toolbox3 Program:

--	--

Observation:

- Analyze the commands to ensure the tool is accurately drawing.

Results & Inference:
